

# Getting started

Two minutes to set up — then it's just tapping through cards.

## iPhone & iPad

Do this in **Safari** — it won't work from Chrome or another browser.

1. 1 Open the page in **Safari**.
2. 2 Tap the **Share** button — the square with an arrow pointing up, usually at the bottom of the screen.
3. 3 Scroll down the menu and tap **Add to Home Screen**.
4. 4 Tap **Add** in the top corner.

## Mac

Also in Safari, from the menu bar.

1. 1 Open the page in **Safari**.
2. 2 Choose **File** in the menu bar.
3. 3 Choose **Add to Dock**.

An icon appears in your Dock, opening the app in its own window.

## Why bother installing it

A browser tab left untouched for about a week can have its saved data quietly cleared by Safari — including your study progress. An icon added to your Home Screen or Dock is treated differently and doesn't get cleared this way. Always open the app from that icon.

## Keeping devices in sync

If you study on more than one device, you can keep your progress the same on both — no account or password needed.

1. 1 On your first device, open **Settings** inside the app and tap **Get a code for this device**.
2. 2 You'll see a short code, something like **AJYJQ-FLFB8**. Write it down.
3. 3 On your other device, open **Settings** and type that same code into the **Sync code** box.
4. 4 Tap **Sync now** on either device whenever you want to bring them up to date.

---

Studying more than one language here? Repeat the install steps for each one separately — each is its own page with its own progress.
